PROFESSIONAL SUMMARY

Quantitative data scientist with 3+ years of experience building production analytical systems and predictive models in Formula 1. Strong background in Python, SQL, statistical modeling, workflow automation, and multi-source data integration. Proven track record of improving model accuracy, debugging live analytical processes, and partnering closely with technical stakeholders to deliver robust tools.

EXPERIENCE

Audi Revolut F1 Team

Nov. 2022 – Present

Aerodynamics Performance Engineer - Data Science

Hinwil, CH

- Built and deployed physics-informed predictive models across multiple technical data sources, improving model accuracy by 50% and increasing confidence in live decision making.
- Automated end-to-end analytical pipelines in Python and MATLAB, cutting model generation and update turnaround time by over 80%, accelerating performance evaluation cycles.
- Delivered real-time data analysis and model-based decision support during 70+ Grand Prix events, providing actionable setup recommendations under strict time constraints.
- Integrated heterogeneous data sources into a unified framework, reducing cross-domain discrepancies and improving downstream model reliability.
- Served as primary interface between modeling, simulation, and performance teams, communicating complex quantitative results into clear technical recommendations.

INDEPENDENT RESEARCH

Systematic Portfolio Research Platform

- Developed a modular research framework for cross-asset signal generation, backtesting, and benchmark comparison.
- Built validation tooling including cost sensitivity, rolling robustness, LOO analysis, and controlled branch testing before promoting strategy changes.
- Implemented paper trading and live-readiness workflows including broker integration, order generation, execution review, and projected post trade status.
- Built internal reporting and dashboard tools to monitor portfolio state, research outputs, and daily operational readiness.

EDUCATION

Oxford Brookes University

Sept. 2021 – Sept. 2022

Master of Science, Motorsport Engineering

Oxford, UK

- **Achievements:** First-Class Honours

Baylor University

Aug. 2017 – May 2021

Bachelor of Science, Mechanical Engineering - Minor in Mathematics

Texas, USA

SKILLS

Programming Languages : Python, MATLAB, SQL

Framework & Libraries : NumPy, pandas, scikit-learn, TensorFlow, PyTorch, Flask

Data Analysis & Modeling : Predictive Modeling & Machine Learning, Statistical Modeling, Data Wrangling

Tools & Platforms : Tableau, GitHub, Kubernetes

Certifications : Machine Learning/AI Engineer Career Path, Build Deep Learning Models with TensorFlow

ADDITIONAL

Languages : English, Italian, and French

Citizenships : USA, Italy, and Germany
